

Chemi-Clean

Simple-to-Use Instructions*:

1. Remove all chemical filtration (Chemi-pure, Chemi-pure Elite, carbon, etc.)
2. Turn off protein skimmer, ozonizer, uv sterilizer.
3. Use air pump with an airstone for upkeep of oxygen. **THIS IS CRITICALLY IMPORTANT.**
4. Use one drop per gallon, wait 48 hours. **It is imperative that you take into account water displacement of sand, rock and filter when dosing!**
5. Perform a minimum 20% water change, then add back your chemical filtration (Chemi-pure, Chemi-pure Elite, carbon, etc.) and let filter run for 24 hours. 6. Turn on protein skimmer, ozonizer, uv sterilizer. Repeat if necessary starting with step 1.

*Disclaimer – We are not liable and cannot be held responsible for improper use of Chemi-clean.
